SYSTEM

# HTSI

An iconic brand. In Italy since 2014 thanks to collaboration with the international Financial Times Group which has been publishing the English language version of the magazine for years.

The Italian world of How To Spend It, unique, where everything is an immersive experience and talent for doing, is the real and global world, with an international vocation, **always maintaining the focus on Made in Italy excellence.**

Over the years the editorial plan has been enriched with an **integrated cross-media system** that ranges from the magazine through to the digital version with original exclusively web-based content and new video and audio formats updated on a daily basis, but also includes the organisation of high-profile events and a large catalogue of books and podcasts.

# PLATFORM

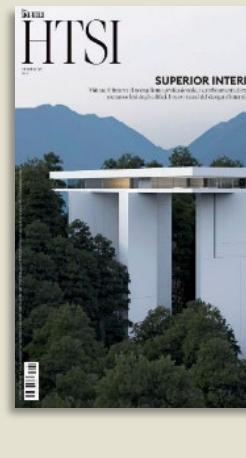

24 ORE  
HTSI

HTSI is part of the Group's wide range of multimedia products, a reference point for the luxury sector that offers a wide range of communication opportunities for the Il Sole 24 ORE target (professionals and entrepreneurs, businesspeople from the worlds of industry and finance).

5 LUGLIO 2024

[Abbonati ora](#)

Buongiorno dalla redazione de Il Sole 24 Ore, questa è **Start**, la newsletter del mattino con tutte le notizie per cominciare la giornata.

Oggi, mentre l'Assemblea Generale delle Nazioni Unite e la Settimana del Clima prendono il via a New York, esploriamo le questioni energetiche più urgenti, tra cui la corsa dell'Europa verso fonti di gas naturale e i lenti progressi dei piani climatici aziendali. E ancora, esaminiamo perché questa insalata da 15 dollari non vale la spesa e diamo uno sguardo al futuro della moda su misura.

**Buona lettura,**

## LUXURY BRAND AWARD

February 2025

HTSI will reward innovation in the world of luxury through 10 prizes awarded to 10 start-ups in the luxury world in line with the values and characteristics that continue to distinguish the exclusivity of HTSI. The start-ups will be selected by an exceptional jury chaired by the Director of HTSI Nicoletta Polla Mattiot and also composed of representatives of the corporate world, including a representative of the brand partner, and other important names who can help identify the best participating companies .

# HTSI

# EVENTS

## HOW TO

### CREATION OF EVENTS WITH AN ADVERTISING PARTNER

A format that involves telling the story of a brand using the expertise of How To Spend It.

Events with a strong emphasis on experience and new discoveries, aimed at an ultrahigh profile audience in terms of target and interests.

Valuable, custom-created occasions dedicated to things worth buying, experiencing and enjoying.

The event also involves a talk presented by Nicoletta Polla Mattiot who will discuss with an expert an issue connected with the event and of interest to the client.

# HTSI

COMMUNICATIONS OPPORTUNITIES

BRANDED CONTENT

# PARTNER OPPORTUNITY/BRAND

## PRINT

- Advertorials
- Premium positions with special formats
- Targeted direct mailing operations
- Inserts created in collaboration with a Brand Partner
- Other.....(TBD with editorial office)

## DIGITAL

- "created for" digital formats in collaboration with the editorial office of How To Spend it:
  - a) **HOW TO STORIES:** videos and/or podcasts and/or photo galleries. Stories as style guides, editorial solutions based on shared topics and sponsored by the brand with product placement opportunities.
  - b) **COMPANY TOURS:** Videos and/or podcasts and/or photo galleries. HTSI in the places where luxury is created for a brand story that starts with *made in*.
  - c) **BACKSTAGE:** Videos and/or podcasts and/or photo galleries. The story of an important moment in the life of a brand - a fashion show, an event, a shoot - through the eyes of HTSI
- digital formats characterised by the wording "**advertising content**"

### ADVERTORIAL

In collaboration with the Brand Partner and on the basis of a brief and materials provided directly by the client, the editorial office creatively reinterprets the message in line with the Look&Feel of the publication.

The added bonus is that the materials are re-edited and laid out directly by the HTSI editorial office in close collaboration with the client.

*N.B. Deadline for the delivery of materials must be brought forward by 10 days compared to what is indicated in the calendar*

### SAPORI SOTTO IL VUCANO

*Lungo le pendici fertili dell'Etna, una produzione di vini che riflette la biodiversità del territorio. In un antico palmento ottocentesco, in pietra lavica, nascono i rossi profondi e i bianchi aromatici di Contrada Santo Spirito.*

E' il vulcano attivo più alto d'Europa, dichiarato patrimonio dell'umanità: l'Etna è abbracciato, lungo le sue pendici fertili di lava, da mille ettari di vigneti che producono, ogni anno, quattro milioni di bottiglie. Un territorio unico, dove i cru prendono il nome di Contrada e se ne contano 123. Ogni versante e ogni altitudine sviluppa caratteristiche diverse: a Nord i rossi, a Est i bianchi, a Sud e Sud-Ovest, rossi e rosati. Vento e luce, calore e umidità, una piovosità fino a dieci volte superiore alla media dell'isola, escurzioni anche di 30 gradi: sono tutti fattori che rendono unica la produzione di questa zona. Sul versante nord i vini restituiscono grandi strutture e una spiccata acidità. In frazione Passopisciaro, la Contrada di Santo Spirito è tra i poli produttivi più neri. Qui, dieci anni fa, Mimmo e Valeria Costanzo decisamente valorizzano un habitat prezioso, ricco di biodiversità. Ristrutturano un vecchio palmento ottocentesco in pietra lavica e ne fanno il cuore produttivo di Palmento Costanzo. Unendo antiche tecni-

# PARTNER OPPORTUNITY PRINT INSERT INSIDE THE MAGAZINE

The insert, entirely editorial, is a real Special (in this case 8 pages) created by the HTSI editorial team based on a brief and materials sent by the client inserted in foliation with the magazine.

**HTSI SPECIAL FATTO A MANO**

**Tra passione e savoir-faire, una storia di famiglia diventa la storia di un territorio e di un modello economico e manifatturiero. L'essenza del made in Italy**

**NEL DISTRETTO MARCHIGIANO OPERANO 3.000 AZIENDE DEL SETTORE CALZATURIERO**

**Testi di Lisa Corva, Caterina Macom, Silvia Paoli, Roberta Sarugia**

**47** **50** **51**

**Dalla shoe valley al mondo: in viaggio passo dopo passo**

**I**o e Melina preparano la zapa e gli uomini andano al lavoro. Facciamo il legno ai bambini e arriviamo sul posto con le scarpe. Il nostro è un lavoro artigianale. Parliamo di arte. Le scarpe importanti della nostra età. I primi mocassini, le prime scarpe col tacco, i primi sandali, i primi stivali, i primi cappelli. Le scarpe perfette. Sandali fatti a mano. Tacco a spillo. Meno e più. Perfezione e originalità. Aggiornatezza e tradizione. E poi ci sono le scarpe degli angeli dei piedi facciani di noce». Una pagina di *La donna*, su che scrivono recenti (Baldari Forghieri), scritte da molti anni. Scritte da un poeta. Scritte da un poeta che si ricorda di quando era un ragazzo, appena nato, appena cresciuto, appena cresciuto in un paese dove non c'era nulla, niente, risotti emulsionati, vanghi, insenati. Luca Belotti scriveva negli anni Sessanta e Settanta, proprio quando Santoni, uno dei primi a credere nel suo talento, lo aveva scoperto. «Lui ha messo suoi primi passi. E oggi porta avanti con orgoglio l'eccezionalità del made in Italy in tutto il mondo, a partire da Corridonia, dove nasceva, e poi da altri paesi, come l'India, dove ha aperto fabbriche. Ma di strada corre, super fast, quelle delle Marche sono scese da un'altra strada ormai dimenticata, quella dei pescatori di Angeli Pesci, ci sono i vapori del Velluchino e le imponenti statue di Federico da Montefeltro, nel Palazzo Ducale di Urbino. E sono le scarpe che hanno fatto la storia dell'industria italiana. E le scarpe che oggi nelle fabbriche, nei laboratori, c'è chi continua ad applicare il codice: non sulla pelle di mazzacane e rottobete. E a cuore, ordine, riferito a matrice, punto dopo punto. Così è nata la nostra Esagono (il C).

**Reference Santoni**

SAMPLES WITH GLUE DOT

DIRECT MAIL: POSSIBILITY OF SENDING CATALOGUES,  
INVITATIONS AND SAMPLES WITH THE MAGAZINE  
TO A TARGETED LIST OF READERS

# PARTNER OPPORTUNITY DIGITAL

## «CREATED FOR»

The “CREATED FOR” format was designed to put the brand at the centre of a story to be built together.

The client identifies a topic of interest they would like to cover in an article (around 4000 characters) written by the media factory of the 24 ORE Group using materials provided by the client, therefore producing relevant and newsworthy “branded” content.

The article will then be published in feed, in the HTSI section with the running head “CREATED FOR CLIENT NAME”

“Created for” digital branded content will be supported by an **advertising and social media campaign** on IG to increase content visibility.

“Created for” video and audio content will be denoted with dedicated bands in the HTSI section together with editorial **VIDEOS/PODCASTS**.

Both types are hosted in the HTSI section of Stream24 on Sole24ore.com and on the Brand Connect page again in the Stream24 area.

**Pulito, sicuro, efficiente: il riscaldamento del futuro è già qui.**

Una nuova generazione di pompe di calore verso la decarbonizzazione e l'indipendenza energetica.

15 dicembre 2022

Ascolta la versione audio dell'articolo

3' di lettura

Con il Green Deal l'Unione europea mira a diventare climaticamente neutrale entro il 2050. L'Ue fa da apripista, investendo in soluzioni tecnologiche realistiche, responsabilizzando i cittadini e allineando le azioni in settori chiave come la politica industriale, la finanza e la ricerca, garantendo l'equità sociale per una giusta transizione. Un terzo degli investimenti del NextGenerationEU è destinato a questo patto per la decarbonizzazione e per una crescita più equa capace non solo di assicurare competitività e leadership tecnologica, ma anche di conseguire gli obiettivi climatici, produrre energia più pulita per un'industria e un'edilizia sostenibili ed efficienti dal punto di vista energetico.

Le pompe di calore sono il mezzo principale per decarbonizzare il riscaldamento degli ambienti e dell'acqua negli edifici, come spiega l'International Energy Agency, IEA, nel recentissimo rapporto ["The Future of Heat Pumps"](#), riferendo che mai come ora si è manifestato un sostegno politico verso questa opzione: il piano REPowerEU in Europa (che mira a raddoppiare le installazioni di pompe di calore entro il 2026 e a realizzare l'indipendenza energetica dal gas russo entro il 2030), l'Inflation Reduction Act negli USA e altre iniziative in tutto il mondo.

Con il pacchetto Fit for 55% del 2021, l'Ue ha varato 13 proposte legislative per centrare l'obiettivo di ridurre le emissioni di gas serra del 55% entro il 2030.

Il risparmio energetico ha un ruolo strategico e coinvolge le imprese, cittadini e organizzazioni anche perché il settore residenziale (climatizzazione e acqua calda) è responsabile di circa il 30% dei consumi finali di energia e del 12% delle emissioni dirette di CO<sub>2</sub>.
